I am a full-stack software Developer with 3 years of experience in developing with small teams, especially interested in building good mobile and Web experiences, scaling systems up, and shipping reliable applications. I have strong experience working in collaborative team environments and look forward to hearing from you.

Experience

Software Dev **Task Collab App -*Web*** **Oct 2025 – Dec 2025**
Backend team Waterloo, Canada

- Completed fully functional backend and led backend development.
- Contributed ~90% to backend and ~20% to frontend development using ASP.NET, C#, for a Backend API, frontend built with React, HTML, CSS, and Bootstrap, GitHub used for version control.
- Implemented real-time notifications across the application using SignalR Hub pipelines.
- Applied Command pattern, Factory, Service, SOC, Decorator, DTO, and Clean Architecture patterns to improve maintainability and scalability.
- Used a local database environment for development and testing purposes.

Software Dev **Equipment Rental App - *Web*** **Sep 2025- Dec 2025**
Backend & Frontend team Waterloo, Canada

- Rental app for stores to utilize Completed functional rental API, led frontend and contributed to backend
- Implemented Google OAuth 2.0 for Authorization Followed ASP.NET MVC, service pattern, Soc and layered architecture. The backend was hosted on a remote server.
- CSHTML, Bootstrap, Css, C# and GitHub for version control

Software Dev **Meditation App – Mobile** **Jan 2025- April 2025**
Features Team Waterloo, Canada

- Implemented “Sounds” and “Habit Tracker” features (100% ownership) and contributed to other app features (30%) using Flutter, Dart, and GitHub.
- Firebase, local database (SQLite) for local and remote syncing

Software Dev **Car Rental App - Android** **2014**
Waterloo, Canada

- Developed the “Car Screen” feature and contributed to additional app features, including UX design, using Jetpack Compose.
- Implemented application logic in Kotlin and applied design patterns such as Singleton, Factory, and Observer.
- Integrated Firebase and SQLite to manage and sync app data, ensuring real-time updates and local persistence.

Technologies and Languages

- Languages: Java, C#, Dart, HTML, CSS, JS, SQL, Kotlin, Dart, SQL
- Technologies: MySQL, Postgres, Git, vs, vsc, android studio, intellij
- Other: visual paradigm, Excalidraw

Education and Certifications

- **Advance Diploma . Computer Programming and analysis ,** Conestoga College Waterloo. **2023- 2026**
- **OSSD . Highschool Diploma,** Lakeshore Catholic High School Port Colborne. **2019 – 2023**

Projects

Software Dev **Micro Service – web** **Dec 2025 – Jan 2025**

Software Dev

- **Another project -** Developed an e-commerce application using a microservices architecture with Spring Boot and Netflix Eureka, applying modern API design principles, service discovery, caching, and scalable microservices architecture patterns

Software Dev **Small Demo Apps – web, mobile, android** **Dec 2025 – Jan 2025**

Dev team

- **Projects:**
  - News Page Utilized APIs in react.
  - Small calculator apps in all languages mentioned.

Education Details

- 3 years of hands-on experience collaborating with classmates in team-based environments to design and develop small- to medium-scale applications.
- Applied software development methodologies include Agile and Waterfall, with an understanding of planning, sprints, and documentation workflows.
- Implemented and applied common software design patterns while building projects, focusing on clean architecture, maintainability, and scalability.

Interests

- Cooking, working, Coding, Soccer, Video Games,
